Cat® ToughGuard™ Hose

Maximum performance. Maximum economy.

With cover abrasion being the leading cause of hose failure in rugged environments, hydraulic hose frequently requires greater abrasion resistance than standard rubber-covered hose can give. Cat® ToughGuard™ Hose offers abrasion resistance far exceeding the capabilities of standard hose.

A polyethylene exterior provides increased resistance to abrasion caused by hoses rubbing together or against other abrasive materials. Additionally, this cover:

- Eliminates the need for nylon or plastic add-on protection in most applications
- Does not sacrifice minimum bend performance
- Offers protection against chemicals and weathering
- Is compatible with Cat XT™ Reusable Couplings
- Uses existing clips and grommets
- Has tested to two-million abrasion cycles without failure

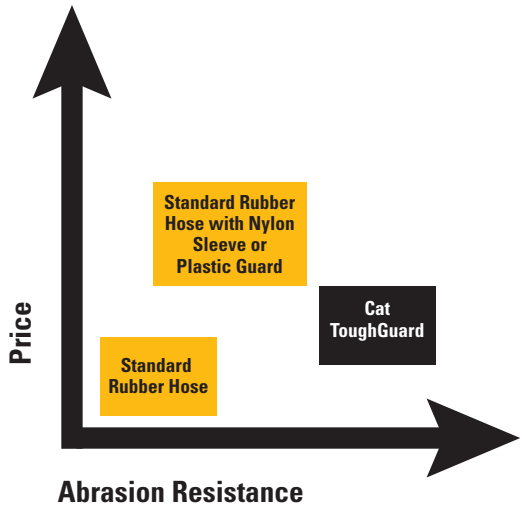

CATERPILLAR®

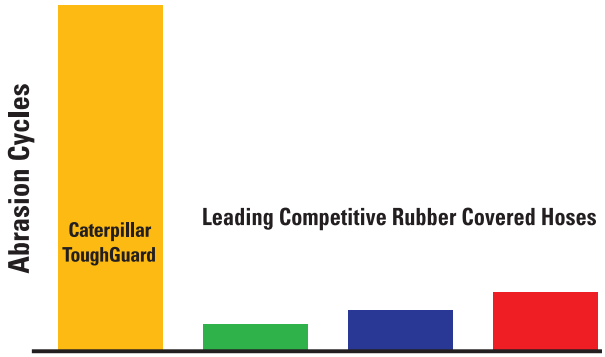

When hose abrasion is a problem, let Cat ToughGuard Hose take the abuse instead of your bottom line.

Abrasion-related hose failure means less productivity. Besides helping to increase machine uptime, Cat ToughGuard Hose significantly reduces material and labor costs associated with other hose-protection options. Cat ToughGuard Hose further minimizes costs with the use of existing Cat XT ES Reusable Couplings.

Compare Abrasion Resistance*

* The International Standards Organization (ISO) abrasion resistance test requires a 50N (11 lb) steel tool to be cycled back and forth along the length of the hose until the cover wears away to the point of wire exposure.

CAT® DEALERS DEFINE WORLD-CLASS PRODUCT SUPPORT.

We offer you the right parts and service solutions, when and where you need them.

The Cat Dealer network of highly trained experts keeps your entire fleet up and running to maximize your equipment investment.
