BENEFITS TO YOUR BUSINESS

For a great return on your investment, and low total cost of ownership, you can't beat the energy efficiency, performance, durability and easy maintenance of this range.

Equipped to withstand harsh duties and conditions, and easily programmable, you will find flexible, operator-friendly models for an impressive variety of uses.

Your Cat® lift truck dealer will show you the one that matches your requirements perfectly, and will be there to give you all the support you need to maximise your materials handling productivity and profitability.

BUILT AROUND YOUR OPERATOR

Your most valuable assets of all are your personnel. Like you, we invest heavily in meeting the needs of operators – and that investment generates increased productivity. Here are just a few of the design features that give your operator the comfort and control to do the best job possible.

- Smooth, quiet, precisely controlled performance
- Clear all-round view
- Uncluttered space for legs and feet
- Adjustable full-suspension seat and tiltable steering column
- Easy-to-reach, easy-to-use controls
- Informative, simple-to-read instrument panel
- Unobstructed on/off access with low step heights and handy grab bars

FLEXIBLE AND TRULY ECONOMICAL

Performance and efficiency can be optimised for each application through full programming, or by simply selecting one of the pre-set operating modes. Profits are maximised by achieving the right balance between output and economy.

MAIN WAREHOUSE

NORMAL WAREHOUSE

- Moderate acceleration, moderate travel speed, moderate hydraulic speeds.

SHIPPING AREA

HIGH PERFORMANCE

- Fast acceleration, fast travel speed, moderate hydraulic speeds.

LONG SHIFTS

ECONOMY

- Slow acceleration, low travel speed, moderate hydraulic speeds.

OUTSIDE APPLICATION

LONG TRAVEL

- Slow acceleration, high travel speed, moderate hydraulic speeds.

RECEIVING AREA

SHORT SHUTTLE

- Fast acceleration, low travel speed, moderate hydraulic speeds.

COMPLETE FLEXIBILITY AND LOW TOTAL COST OF OWNERSHIP

For extra application flexibility, many of our trucks offer panel cabin options and sealing of key components – allowing comfortable and dependable operation both outdoors and indoors.

As well as saving money daily with their low energy consumption, our lift trucks are able to reduce the total cost of ownership through features such as:

- Sealing of components against water and other contaminants
- Wet disc brakes and other low-maintenance systems
- Use of highly durable materials and designs
- Long service intervals

1.0 - 1.5 TONNES | 24V

LIGHT DUTY

ECONOMY

Ideal for relatively light duties and intermittent shift patterns, these trucks are extremely compact and easy to use by inexperienced staff with only a little training. They are also very economical, with energy consumption typically as low as 4.75 kW/h in the applications for which they are designed.

TYPICAL APPLICATIONS

- Grocery stores
- Do-it-yourself stores
- Garden centres
- Food and beverage distribution
- Container stuffing
- Narrow aisle work

Inbuilt intelligence

Like our larger electric lift trucks, these models are individually programmable to suit the operator and task. They also offer five simple-to-select pre-set operating modes for different situations and user priorities. Their electronics include built-in system protection and a fault memory. With the assistance of these features the operator is able to work at maximum efficiency, while correct use and maintenance is simplified and downtime is minimised.

3 WHEEL, 24V MODELS

MODEL	CAPACITY (tonnes)	VOLTAGE (V)	LOAD CENTRE (mm)
EP10KRT PAC	1.0	24	500
EP15KRT PAC	1.5	24	500

Big on comfort

Operators of these extremely compact trucks enjoy levels of comfort that would normally be found only on larger models. Their standard specification includes a full-suspension, adjustable seat and a tiltable steering column which can be set at the operator's preferred angle. There is also a comfortable amount of floor space, despite the small dimensions of the truck.

Ergonomic and safe

On/off access is easy from both sides, thanks to rounded panel corners and low step heights. This is particularly welcome when working in narrow aisles and other confined areas. Whenever the operator leaves the seat, the Presence Detection System (PDS) prevents any accidental movement of the truck or its mast and forks.

KEY FEATURES AT A GLANCE

- Economical 24V AC drive motor, mounted on the rear (steering) axle, gives optimum torque/speed balance.
- Low-voltage cut-out protection system prevents damage to battery through excessive discharge.
- MicroCommand® AC controller optimises energy efficiency and maintains smooth performance.
- Programmability matches operating parameters to operator and task for optimum balance of performance, energy efficiency and safety.
- Run-time diagnostics continuously monitor main systems, alerting operator to any problem or maintenance need.
- Regenerative braking recycles energy, for longer shift life, and reduces brake wear.
- Easy-to-reach, short, ergonomically designed hydraulic levers enhance load handling control and precision.
- Dual tilt cylinder mast configuration improves rigidity and stability for high lifting.
- Short wheelbase and precise steering mean excellent manoeuvrability.
- Simplified systems and easy access for checks, maintenance and repairs keep downtime to a minimum.
- Presence Detection System (PDS) prevents all travel and hydraulic movement if the operator is not seated.
- Service interval of 500 hours limits downtime.
- Familiar auto-style pedal and steering wheel arrangement is intuitive and ergonomic.
- Reversing alarm is fitted as standard to ensure awareness and caution.

1.0 - 2.5 TONNES 48V & 3.0 TONNES 72V

WIDE-RANGING UTILITY

These versatile forklift trucks offer a wide capacity range, covering everything from light to medium warehouse duties, along with high lifting capability where needed. Whichever model you choose, you will benefit from impressive levels of efficiency, manoeuvrability, productivity, ergonomics, safety and whole-life economy.

TYPICAL APPLICATIONS

- Food and beverage manufacturing and wholesale
- Chemicals, textiles and rubber
- General and refrigerated warehousing and storage
- Machinery and heavy equipment
- Electric equipment and components

Refined performance

The latest advances in motor and controller technology not only boost power and energy efficiency but help to give the trucks a quiet, smooth, refined feeling. Their electric power steering, featuring speed compensation, combines with a compact chassis for supreme, effortless manoeuvrability even in the tightest of racking spaces. An ergonomic operator compartment, complete with full-suspension seat, adjustable steering column and conveniently placed levers, adds to the sense of comfort and control.

Safe productivity

Automated safety aids include a neutral start function, preventing unintentional truck movements, and a controlled rollback system. Excellent ramp performance combines with controlled rollback to enhance both efficiency and safety when working on inclined surfaces. A reversing alarm and a good all-round view through the high-visibility mast and overhead guard are provided as further essentials to safe and productive operation.

4 WHEEL, 48V / 72V MODELS

MODEL	CAPACITY (tonnes)	VOLTAGE (V)	LOAD CENTRE (mm)
EP10CA	1.0	48	500
EP14CA	1.35	48	500
EP15CA	1.5	48	500
EP18CA	1.75	48	500
EP20CA	2.0	48	500
EP25CA	2.5	48	500
EP30CA	3.0	72	500

Lifetime economy

The low energy consumption of these trucks will save money every day, and there is even an automatic cut-out function to avoid wasting power while they are not in use. In the longer term, costs are cut by reducing maintenance needs, damage and downtime. Brake component wear is minimised, and energy economy is increased, by four-mode regenerative braking. Operators and engineers are encouraged to be aware of truck status, routine servicing needs and faults by the easy-to-read Vacuum Fluorescent Display (VFD) panel and the onboard diagnostic functions. When repairs or service tasks are needed, quick access to the hydraulic and traction motors, control panel and other key systems saves time and expense.

KEY FEATURES AT A GLANCE

- Advanced AC motor technology gives excellent torque, acceleration and ramp performance, along with smooth, quiet, controlled operation.
- New-generation AC controller maximises power and energy efficiency while ensuring the lowest noise level in its class.
- Electric power steering with speed compensation as standard provides effortless manoeuvrability, and compact chassis is perfect for use in tight right-angled stacking aisles.
- Controlled rollback and outstanding ramp capability allow safe and productive work on inclines.
- Mast and overhead guard structure provides excellent all-round visibility, and reversing alarm is fitted as standard.
- Vacuum Fluorescent Display (VFD) panel keeps operator aware of truck hours and battery state, even in bright daylight.
- Self-diagnostic functioning with display icons, messages and fault history folder helps operator and engineer to maintain truck, prevent damage and maximise uptime.
- Four-mode regenerative braking maximises shift life and productivity, enhances performance and reduces brake wear.
- Auto power-off mode conserves energy by shutting down the truck if it remains unused after 15 minutes.
- Neutral start safety function prevents unintentional movement of the truck.
- Ergonomic operator compartment features full-suspension seat, adjustable steering column and easily reached hydraulic control levers.
- Low step height and convenient grab bar allow easy on-off access, saving time and effort – especially in repetitive situations.
- Easy access to control panel, traction motors and hydraulic motors reduces servicing time and cost.
- Lift height selector and laser pointer options aid load handling precision.

1.3 - 2.0 TONNES | 48V

COST- SAVING DURABILITY

This series of compact, efficient, dependable three wheel forklift trucks is well suited to a variety of applications, including work in small spaces. The trucks will cope with wet and dusty conditions and will save on lifetime costs thanks to their low maintenance requirements and overall durability. As well as superior levels of performance and productivity, their design and specification focuses on providing a safe, comfortable, satisfying experience for the operator.

TYPICAL APPLICATIONS

- Food and beverage manufacturing and wholesale
- Fishing and fish processing
- Chemicals, textiles and rubber
- General and refrigerated warehousing and storage
- Machinery and heavy equipment
- Electric equipment and components

Superior performance

Benefiting from the latest advances in motor and controller technology, these trucks are powerful, energy efficient and outstandingly smooth, quiet and precise in operation. The sense of control is complemented by their on-demand, low-noise, electric power steering system which, along with the trucks' compact dimensions and small turning circle, allows effortless manoeuvring.

Unusually, the trucks feature a Pitching Control System (PCS) that reduces load vibration and swaying when travelling over bumpy, rough and uneven surfaces. This saves the operator from discomfort, protects goods from damage and lowers the risk of a load-shedding accident. There are eight drive modes and three acceleration modes, from which the optimum blend of performance and economy can be chosen to match the demands of each situation. A comfortable operator compartment, with full suspension seat and conveniently arranged controls, adds further ergonomic advantages to help maximise output.

Durability and economy

Energy economy is exceptionally high, thanks largely to the technological superiority of the motors, controller and steering system. There is also a four-mode regenerative braking system that saves energy and reduces brake component wear. The trucks' wet disc brakes give powerful braking performance and are virtually maintenance-free – apart from replacing the oil at 1,200-hour intervals. They are sealed against damaging water, dirt, dust and salt. Meanwhile, the motors and other electrical components are sealed to IPX4 standard against rain, splashing water, mud and dust.

Other factors reducing maintenance requirements and costs include the electric power steering system, which eliminates steering-related hydraulic maintenance and oil leakage. As all wasted energy costs money, the trucks have an auto power-off mode that shuts them down if they are left unused. The attention of operators and engineers is drawn to truck status, routine servicing needs and faults by the highly visible Vacuum Fluorescent Display (VFD) panel, backed by onboard diagnostic functions, helping to minimise the expense of downtime.

Safety features

The trucks are fitted with a Presence Detection System (PDS), which prevents all travel and hydraulic movement unless the operator is properly seated. They also feature a controlled rollback system that combines with their excellent ramp performance to enhance both efficiency and safety when working on inclined surfaces. Stability is helped by the wide-tread dual rear wheel design, while other essential safety aids include good all-round views, through the mast and overhead guard, and a reversing alarm.

In addition to the wide selection of options and capacities, you can choose between compact (C) – for tight spaces – and standard chassis versions. Turning circles are particularly small in these 3 wheel trucks, which are ideal for intensive short-shuttle work and use in confined areas.

3 WHEEL, 48V MODELS

MODEL	CAPACITY (tonnes)	VOLTAGE (V)	LOAD CENTRE (mm)
EP13TCB	1.3	48	500
EP15TCB	1.5	48	500
EP16TCB	1.6	48	500
EP16TCB	1.6	48	500
EP18TCB	1.8	48	500
EP18TCB	1.8	48	500
EP20TCB	2.0	48	500
EP20TCB	2.0	48	500

KEY FEATURES AT A GLANCE

- Advanced AC motor technology gives excellent torque, acceleration and ramp performance, along with smooth, quiet, controlled operation.
- New-generation AC controller maximises power and energy efficiency while ensuring the lowest noise level in its class.
- On-demand power steering provides effortless, precise manoeuvrability and minimises noise, energy consumption and maintenance.
- Pitching Control System (PCS) reduces load vibration and swaying when travelling over bumps or uneven surfaces.
- Wet disc brakes require almost no maintenance – other than oil replacement at 1,200 hours – and are unaffected by water, dirt or salt.
- Presence Detection System (PDS) protects by preventing all travel and hydraulic movement if the operator is not seated.
- Controlled rollback and outstanding ramp capability allow safe and productive work on inclines.
- Mast and overhead guard structure provides excellent all-round visibility, and reversing alarm is fitted as standard.
- Vacuum Fluorescent Display (VFD) panel keeps operator aware of truck hours and battery state, even in bright daylight.
- Self-diagnostic functioning with display icons, messages and fault history folder helps operator and engineer to maintain truck, prevent damage and maximise uptime.
- Programmability includes eight drive modes and three acceleration modes, matching performance with the demands of the application and optimising energy economy.
- Four-mode regenerative braking maximises shift life and productivity, enhances performance and reduces brake wear.
- IPX4 sealing protects motors and other electrical components from rain, splashing water, mud and dust.
- Auto power-off mode conserves energy by shutting down the truck if it remains unused for 15 minutes.
- Wide-tread dual rear wheel design increases truck stability.
- Ergonomic operator compartment features full suspension seat, adjustable steering column and easily reached hydraulic control levers.
- Low step height and convenient grab bar allow easy on-off access, saving time and effort – especially in repetitive situations.

1.3 - 2.0 TONNES | 48V

VERSATILE 3 & 4 WHEEL POWER

These dependable ‘workhorses’ are kind to the environment and gentle on the operator – but tough in the face of wet, dusty and other adverse conditions. Compact and highly manoeuvrable, they are well suited to workplaces with restricted space and height such as containers, lorries and drive-in racking.

TYPICAL APPLICATIONS

- Food and beverage manufacturing and wholesale
- Fishing and fish processing
- Chemicals, textiles and rubber
- General and refrigerated warehousing and storage
- Machinery and heavy equipment
- Electric equipment and components

Unstoppable performance

The trucks will work non-stop in a huge variety of applications and conditions. Blasting rain, splashing water, mud, dust and other contaminants are no problem, thanks to their maintenance-free wet disc brakes and IPX4 component sealing. For back-to-back shifts, the optional lateral battery exchanger ensures no time is wasted – while accommodation of both DIN and BS size batteries avoids complication. Extra productivity is gained by a long service interval of 1,000 hours.

To avoid downtime and expense resulting from damage to the truck, load and racking – and, most importantly, to protect the operator and other workers – a number of safety features are built into the design. They include PDS+ (Presence Detection System+), which prevents all movement of the truck and its hydraulics if the driver is not seated. PDS+ also has an automatic parking brake and hill hold function. Intuitive

Speed Control automatically avoids excessively fast cornering.

Perfect precision and control

From the comfort of an adjustable suspension seat, the operator finds an array of ergonomically designed controls within easy reach. The ‘steer-by-wire’ system has a small steering wheel – just 25 cm – which requires minimal turning effort. Fingertip hydraulic controls are set into an adjustable armrest and there is an auto-style pedal layout.

The masts and overhead guard (OHG) are designed to give a clear view of the fork tips, racking and loads. An optional Hi-Viz OHG enhances upward views while protecting the operator from small falling objects and rain. Made from polycarbonate, with a glass layer to prevent scratches and discoloration, it is reinforced with steel towards the rear while its front is totally transparent.

More choices

The Hi-Viz OHG (High Visibility Over Head Guard) can be complemented by a range of all-weather cabin packages and equipment, with options including front and rear panels, side doors, wipers, heater, 12V connector, sun visor, tilt cylinder covers and interior light.

In addition to the wide selection of options and capacities, you can choose between compact (C) – for tight spaces – and standard chassis versions in both the 3 wheel (T) and 4 wheel model lists. Turning circles are particularly small in the 3 wheel trucks, which are ideal for intensive short-shuttle work and use in confined areas.

3 WHEEL, 48V MODELS

MODEL	CAPACITY (tonnes)	VOLTAGE (V)	LOAD CENTRE (mm)
EP13PNT	1.3	48	500
EP15PNT	1.5	48	500
EP16CPNT	1.6	48	500
EP16PNT	1.8	48	500
EP18CPNT	1.6	48	500
EP18PNT	1.8	48	500
EP20PNT	2.0	48	500

4 WHEEL, 48V MODELS

MODEL	CAPACITY (tonnes)	VOLTAGE (V)	LOAD CENTRE (mm)
EP16CPN	1.6	48	500
EP16PN	1.6	48	500
EP18CPN	1.8	48	500
EP18PN	1.8	48	500
EP20PN	2.0	48	500

KEY FEATURES AT A GLANCE

- Wet disc brakes require no maintenance and are unaffected by water, dirt or salt.
- Long service interval – 1,000 hours – increases uptime.
- Small steering wheel and 'steer-by-wire' system gives comfortable, precise control with minimal effort.
- Presence Detection System+ (PDS+) provides automatic parking brake and hill hold function, while preventing all travel and hydraulic movement if the operator is not seated.
- IPX4 sealing protects motors and other electrical components from rain, splashing water, mud and dust.
- Intuitive Speed Control automatically adjusts drive speed, in proportion to the steering angle, for safe cornering.
- LED working lights are highly effective and require no maintenance.
- Mast and overhead guard (OHG) structure provides excellent all-round visibility.
- OHG is designed for simple fitting of panel cabins.
- Rear grab handle with integral horn button increases comfort and safety while reversing.
- Diagnostics and precise matching of performance to operator and application needs can be achieved quickly and simply via laptop connection.
- Familiar auto-style pedal layout is intuitive and ergonomic.
- Adjustable armrest with fingertip hydraulic controls makes load handling comfortable, effortless and precise.
- Fully adjustable suspension seat ensures comfort for all shapes and sizes of operator.
- Tilttable steering column adjusts to suit operator.
- Open step design allows easy on/off access.
- Accommodation of both DIN and BS size batteries gives extra flexibility.
- Access to all components is simple and quick, to minimise downtime for servicing.
- Market-leading low noise levels add to operator comfort.
- Multi-function display ensures operator and service engineer awareness of truck status, encouraging correct use and maintenance.
- Cold store modification and dual pedals available as options.

2.5 - 3.5 TONNES | 80V

INTENSIVE

PRODUCTIVITY

This range answers the need for high-powered performance in applications where IC engine lift trucks and their emissions are not permissible. Designed to cope with intensive duties and tough conditions, the trucks are highly productive and, at the same time, a pleasure to drive, thanks to their agility, intelligence and comfort.

TYPICAL APPLICATIONS

- Food and beverage manufacturing and wholesale
- Paper manufacturing and wholesale
- Foundries
- Chemicals, textiles and rubber
- Machinery and heavy equipment

Agile and intelligent

The perfect lift truck should constantly adjust its own performance characteristics as circumstances change, and in this range the idea of intelligent automatic adaptation has been taken to a whole new level. Its adaptive speed control, which is part of the Responsive Drive System (RDS), seems to know how the driver wants the truck to behave at any moment. Reacting to how quickly the accelerator pedal and hydraulic controls are being moved, it instantly selects the most appropriate mode. RDS also smooths out all stops, starts and other movements.

Compared to traditional cornering systems, this truck's intelligent curve control reduces speed in a much more natural and comfortable way. Starting with a small reduction, as the turn begins, the system responds so smoothly to the steering that the driver notices no sudden change or tilting sensation as the truck corners. Another great advance over its competitors is the next-generation dual drive 4 wheel steering system, which makes the truck much more manoeuvrable. With +100° rear axle rotation and curve control, turns are tight and smooth. When reversing, side turns can be made immediately

4 WHEEL, 80V MODELS

MODEL	CAPACITY (tonnes)	VOLTAGE (V)	LOAD CENTRE (mm)
EP25N	2.5	80	500
EP25CN	2.5	80	500
EP30N	3.0	80	500
EP30CN	3.0	80	500
EP35N	3.5	80	500

without pushing back. Uniquely, the truck can actually be steered using the front axle. As well as giving improved agility and grip, the system reduces tyre wear and stress on the rear axle.

Comfortably in control

The spacious, high-comfort cabin and its equipment are ergonomically designed to allow strain-free operation with minimal need for the driver to move. Features include a flat, unobstructed floor, adjustable seat and steering wheel, pedals at optimum angles and, to maximise the view, a specially inclined dashboard and counterweight. A totally redesigned adjustable armrest brings the new progressive hydraulic controls and related functions within comfortable reach of the operator's fingertips. Even entering or leaving the cabin is easy, thanks to the step's large, high-grip surface, the long grab handle and the curved shape of the battery cover and side panel, which encourage fast, flowing motion.

The operator is kept fully informed via a colour display, which can be read easily from different angles. Clear messages are given in the operator's language, along with helpful symbols. A twin-mode key switch can be set to ECO or PRO, depending on the driver's experience and the need for low energy use or rapid performance.

KEY FEATURES AT A GLANCE

- Responsive Drive System (RDS) with adaptive speed control adjusts truck performance modes in reaction to quickness of foot and fingertip movements, to meet driver's changing needs, and ensures smooth starts and stops.
- Intelligent curve control makes speed reduction in cornering feel natural, with no sensation of leaning, for safe but productive driving.
- Twin-mode key switch offers ECO setting for beginners, or for low energy consumption, and PRO for experienced drivers and high performance, while optional customisation is available to meet specific needs.
- Next-generation dual drive 4 wheel steering system, with curve control, +100° rear axle rotation, instant no-push side turns and unique ability to steer using front axle, delivers unbeatably agile manoeuvring, better traction and longer tyre life.
- Full-colour, weather-protected, clear-view display, with information in operator's own language and simple-to-learn functionality, advises on truck status, avoids misuse and protects your investment.
- Totally redesigned adjustable armrest, combining anatomical support with free movement and perfect hand positioning, features spring-force-optimised fingertip hydraulic controls or – as an option – intuitive joystick control.
- Wide, high-grip step, long grab handle and curved truck design allow fast, smooth-flowing on-off access to large, comfortable operator space with flat, unobstructed floor.
- Ergonomic layout of controls and display, together with adjustable seat and steering wheel position, optimised pedal angles and excellent all-round view, allows strain-free operation.
- Armrest options include control of forward/reverse selection, clamp release and automatic tilt centring, using only the driver's fingers.
- Intelligent speed and movement reduction (optional) automatically limits travel and tilt rates when forks are above free lift height, to optimise both stability and agility.
- Automatic hydraulic parking brake and hill hold function, instantly engaged when accelerator is released, prevents rolling on ramps without need for use of a switch or lever.
- High standard specification includes Presence Detection System+ (PDS+), maintenance-free wet disc brakes and IP54 sealing of main components.

4.0 - 5.0 TONNES | 80V

HEAVY DUTY EFFICIENCY

Designed to handle intensive applications and harsh environments, where you would normally expect to use IC engine machines, these powerful trucks offer a clean and extremely efficient alternative. Ideal for both outdoor and indoor operation, and able to use a variety of heavy attachments, there is sure to be a configuration within the range of models, capacities, chassis sizes and options to meet your exact needs.

Typical applications:

- Food and beverage manufacturing and wholesale
- Paper and pulp
- Saw mills
- Furniture
- Steel works and foundries
- Ports
- Carpet manufacturing and wholesale
- Chemicals, textiles and rubber
- Machinery and heavy equipment
- Automotive assembly
- Building and construction

Power and economy

The latest innovations in intelligent, high-efficiency design generate maximum power while consuming substantially less energy than competitors' trucks. In most applications a single charge will keep the truck going through two shifts. This has been achieved through developments such as the compact component layout, the market's most advanced AC control system and optimised use of regenerative braking.

Lateral battery extraction, with the option of an ergonomic adapter for the easiest and quickest exchanges in the industry, helps to keep the trucks in constant productive motion. Profits are also maximised by reducing

4 WHEEL, 80V MODELS

MODEL	CAPACITY (tonnes)	VOLTAGE (V)	LOAD CENTRE (mm)
EP40C 2	4.0	80	500
EP40 2	4.0	80	500
EP40S 2	4.0	80	600
EP45C 2	4.5	80	500
EP45 2	4.5	80	500
EP50 2	4.99	80	500
EP50S 2	5.0	80	600

damage and wear through use of long-life components like wet disc brakes and sealed motors. Clear information for operators and engineers, through a premium display, is another aid to extending the truck's life.

Comfort and protection

The high-comfort floating operator cabin has a spacious floor, a fully adjustable, full-suspension seat and a compact steering wheel on a column with both telescopic and tilt adjustment. There is a choice between standard hydrostatic steering and the option of parametric electronic steering, for the ultimate in effortless precision. An adjustable armrest places the hydraulic controls – a fingertip unit or, if you prefer, a joystick – in the perfect position for each operator. Other operator-friendly touches include a full-length convenience tray.

Operators are protected not just by the truck's robust construction but by a host of automated assistance features. These include controls on access, drive speed with forks lifted, cornering speed and movement on ramps. As well as standard lights, there are various optional lighting kits, mirrors and other accessories to meet different practical and safety needs.

KEY FEATURES AT A GLANCE

- Compact component layout minimises material costs and increases efficiency.
- Premium display ensures operator awareness of truck status, through clear, simple, informative readouts, encouraging correct use and maintenance.
- Wet disc brakes require no maintenance and are unaffected by water, dirt or salt.
- Sealing to IP54 standard protects motors and electrical connectors from rain, splashing water, mud and dust.
- Intelligent design reduces energy consumption by up to 25%, allowing non-stop operation and extended shifts.
- The industry's most advanced AC control system delivers smooth, precise operation and minimises the risk of operator error.
- ECO and PRO pack options match the truck to its application, providing the appropriate performance-enhancing features and avoiding excessive wear of components.
- Ergonomic adapter option for battery installation and locking allows quick, easy and safe exchanges.
- Added operator protection features give automated assistance to the user, including access control, drive and lift control, curve control, an anti-rollback function and an automatic parking brake, for safe, smooth, easy operation.
- Automatic parking brake and anti-rollback function hold the truck safely in position, particularly on ramps.
- Drive and lift control smoothly reduces travel speed to a safe level when the forks are elevated.
- Curve control automatically adjusts drive speed, in proportion to the steering angle, for safe cornering.
- Access control prevents use of the truck if the seat belt is not correctly fastened.
- Adjustable armrest with fingertip hydraulic controls makes load handling comfortable, effortless and precise.
- Hydrostatic steering – or option of parametric electronic steering – gives high-precision control with minimal effort.

MAXIMISING YOUR UPTIME

To maximise uptime and maintain the performance levels of these durable trucks, we build easy servicing into their design.

Our advanced controllers not only optimise power and efficiency but allow on-the-go system monitoring, self diagnostics and fault memory logging. They warn of problems, tell the technician where to look and even give a reminder when a service is due. With all areas easily accessible, and no need for external test equipment, servicing is fast and simple.

For the best possible return on your investment, your Cat dealer can tailor a cost-effective preventative maintenance plan.

TOTAL SOLUTIONS FOR EVERY CHALLENGE

The performance and durability of these Cat electric lift trucks is without question. It owes much to the expertise, advanced technology and strict quality standards applied by our ultra-modern production centre.

To help you choose the right model and configuration, and maintain its productivity, we have an equally dedicated network of dealers. With their specialist knowledge, wide experience and excellent service they will support you in every way to maximise your profits.

As well as electric counterbalance trucks, they offer a comprehensive range of warehouse equipment and IC engine lift trucks. They also have a broad selection of acquisition options – including outright purchase, short or long term rental and leasing – and will tailor a plan to meet the needs of your business.

Whatever your problem, Cat Lift Trucks and its dealers have the solution.

Whatever materials handling equipment you need, our global network of Cat lift trucks dealers is equipped to provide the solution.

Our constant investment in selecting, developing and supporting our dealer network ensures you receive not just the best equipment but the best service, advice and support in the industry.
