KONECRANES REVERSE CAMERA.

INSTALL EXTRA EYES IN THE BACK.

Ever wished you had eyes in the back when reversing? Our reverse camera kit can be positioned anywhere to prevent blind spots, helping the driver move large tonnages in a safe and efficient way. The camera combines a wide field of view with excellent image quality for reliable guidance. As it integrates with the existing cabin display, no extra monitor is needed.

HOW THE REVERSE CAMERA WORKS.

The camera has 120° field of view and excellent video quality, color and light sensitivity. The fast frame rate provides a high quality video stream with no noticeable latency. The camera can be mounted on the back of the cabin or the rear counterweight, and uses Ethernet to connect to the display. It is fully integrated into the machine display which eliminates the need for additional screens in the cabin. Settings and camera controls are handled by Konecranes software, for functions such as mirror functionality, videoscoping and split screen with 2 cameras.

BENEFITS.

- Provides crisp, clear images and excellent field of view
- No need for additional cabin display
- Flexible mounting solution
- Easy to expand with multiple cameras if needed

WHAT'S IN THE PACKAGE.

When ordering a camera kit, you will receive a complete kit for mounting the camera either on the back of the cabin (ECH machines) or on the rear counterweight (FL & RS). The camera can of course be placed also on other positions on the machine but in those cases you need to consult Konecranes for best fitting & equipment needed.

The standard rearview kits contains:

- 1 camera
- Installation kit
- Mounting instructions

CONTACT.

HOW TO ORDER.

We'll be happy to tell you more or arrange a demonstration. Naturally, we'll also take care of delivery, installation and setup. Talk to your dealer or Konecranes representative today for a safer workplace tomorrow.

BUILT FOR YOUR WORLD. EVOLVING FOR TOMORROW'S.
