KONECRANES REVERSE WARNING SYSTEM.

INCREASE SAFETY WHEN REVERSING.

When visibility is low, the reverse warning system can help prevent accidents by making the driver aware of obstacles in the lift truck's path. The ultrasonic obstacle detection system automatically senses objects, yard staff and other machines, and provides the driver with visual and acoustic alarm signals in the cabin. As the system relies on ultrasonic sensors, it performs well even in bad weather and poor light conditions.

HOW THE REVERSE WARNING SYSTEM WORKS.

The ultrasonic sensors are mounted on the back of the lift truck to detect objects, using high-frequency sound waves inaudible to the human ear. When the lift truck is reversing, acoustic beeps alert the driver if there's a risk of collision. The reverse warning system can be retrofitted to all Konecranes machines, as well as lift trucks from other manufacturers.

BENEFITS.

- Receive a complete kit for mounting the complete solution on your machine.
- Optimal for Harsh conditions, less stress and more comfort for the drivers.
- To further minimize the risk of accidents, we offer a full safety pack for C model trucks equipped with MD4 displays,

consisting of reverse warning system, reverse camera solution.

WHAT'S IN THE PACKAGE.

- 2 ultrasonic sensors
- 1 Display in the cabin
- 1 Control unit
- Installation kit
- Mounting instructions

CONTACT.

HOW TO ORDER.

We'll be happy to tell you more or arrange a demonstration. Naturally, we'll also take care of delivery, installation and setup. Talk to your dealer or Konecranes representative today for a safer workplace tomorrow.

BUILT FOR YOUR WORLD. EVOLVING FOR TOMORROW'S.

Through Konecranes Lifetime Advantage, we make sure that every Konecranes lift truck is up to date, continually improved, and smartly maintained. Want to learn more about how the trucks built for your world can evolve with your needs? Talk to your dealer or visit kcliftrucks.com/services.
